

AIR

A fresh air keeps the doctor way !

Air covers the whole Earth like a big , invisible blanket.

Air is All Around Us

- Air is **all around us**.
- When air moves **gently**, it is called **breeze**.
- When air moves **fast**, it is called **wind**.

What is Air ?

Air is a mixture of gases. Oxygen, nitrogen and carbon dioxide are three of them.

❖ Oxygen is the most important gas for us to live.

Uses of Air

Plants and animals need air to live.

Humans need air to breathe.

Birds fly because there is air.

We fill air in balloons, footballs and cycle tyres.

Air is needed for burning.

Air is used to move things like kite, helicopter, sailboat and windmill.

How air gets polluted ?

Ways to keep our air clean.

- Plant trees in your surroundings.
- Avoid open burning.
- Practice carpooling or prefer walking.
- Reduce, Reuse and Recycle items whenever possible. Buy and use recycled products.
- Use handkerchief to cover your nose and mouth when you cough or sneeze.
